TA Meeting 2025-11-07

- Samuel Börlin (Chairman)
- Olle Ackebjer (Secretary)
- Elias Höök
- Max Fagersten
- Isak Treptow

Review of Group Contract

The team reviewed the group contract and emphasized the importance of communication over conflict. Members agreed to continue improving how meetings are conducted, as some issues have been experienced in maintaining effective discussions.

Decisions

- The MVP (Minimum Viable Product) was defined as the ability to buy and sell a few stocks.
- We decided on using JavaFX instead of the swing library.
- The team will search for a popular ORM library to use in the project.

Meeting Management

We discussed challenges in holding productive meetings and agreed to work on improving our meeting structure.

User Feedback

- User feedback sessions will be held every week.
- Feedback can be collected either by recording short videos or by writing a short report summarizing progress and user impressions.
- We missed collecting user feedback this week.

Other Ideas and Thoughts

- Discussion around different trading bots, simulate users and use some weights to have different types of users. We also discussed ideas for AI-generated stocks.
- Agreement to start defining Epic Stories and Tasks, which will form the basis for development planning.
- Consideration of creating a Kanban board (possibly in GitHub Projects) for developer tasks.
- Begin creating cards for tasks related to Epic Stories.

Things to do

- Set up a Kanban board (GitHub Projects suggested).
- Begin working on Epic Stories and related task cards.
- Structure the MVC architecture for the project with UML.
- Make the MVP
- Feedback process every week.
- Find and decide on an ORM library.
